IXB Products

Pharmacy Rebate Processing

A solution for validating, generating, and managing pharmaceutical rebates. The platform includes an integrated manufacturer portal for downloading invoices and uploading payment information.

ResolveIT CRM

A web-based configurable workflow application and documentation repository. ResolveIT optimizes work management, project tracking, reporting, and performance monitoring with automation and integrated productivity tools.

Medication Therapy Management (MTM)

An algorithm-driven platform designed to improve medication adherence, enhance therapeutic outcomes, and reduce adverse events for targeted beneficiaries. Includes an iOS and Android member App enabling real-time patient reported data and communication.

TMed Telehealth – Prenatal Care

A prenatal care solution designed to support women throughout pregnancy with tools for milestone tracking, care management, education, and direct communication with care teams.

Coverage Determination

A Surescripts ePA-certified platform featuring integrated fax OCR, workflow automation and fast adjudication of drug benefits, currently in final stage of development.

Pharmacy Claims Adjudication

A comprehensive solution for point-of-sale pharmacy claims adjudication, including pharmacy benefit management, financial processing, reimbursement, enrollment, and reporting, currently in development.
